A passionate drive to innovate.

An incredible desire to connect.

A high-held value of sharing knowledge.

Eurodiesel Services was founded on the belief that access to high-quality, yet affordable aftermarket solutions for powertrain systems should be easy. For more than 20 years, we've worked to make this a reality by connecting manufacturers, suppliers, and customers to create innovative aftermarket solutions.

We are excited about the next phase of our journey of supporting green vehicle technology, starting with hybrid battery reconditioning and maintenance. We will continue to innovate and strengthen existing offerings and introduce new solutions to meet our customers' and suppliers' needs.

Harry Jerwani
Chairman

ABOUT US

OUR VISION

To create the platform of choice for aftermarket solutions.

We intend to become a one-stop solution provider for aftermarket fuel injection and turbo needs by connecting all key stakeholders in the industry.

OUR MISSION

To enable sustainable growth for our customers through innovative aftermarket solutions.

Our solutions help customers grow their business. We measure success based on long-term satisfaction of our customers. As forward thinkers, we strive to simplify solutions and provide high-quality, durable and affordable products and services.

WHAT WE DO

We provide end-to-end solutions for fuel injection systems and turbochargers that include OE and replacement parts, components, and test equipment.

We also provide repair services, solutions, and trainings for the fuel injection systems and turbochargers aftermarket industry.

We have continued to grow and evolve since 1997 and today we are privileged to work with customers, in over 40 countries across the world, from our offices in the United Arab Emirates, India and Africa.

OUR PRODUCTS

When you need critical engine components, diesel applications or test equipment, you need industry-standard, high-quality products from a reliable source. At Eurodiesel Services we supply OEM, aftermarket and reconditioned parts for diesel fuel injection systems and turbochargers. Our products are backed by an industry-leading guarantee and no other source has our network of inventory.

Using OEM parts is usually a wise choice, but may not always be an affordable one. We offer a range of turbocharger and fuel injection parts under our own flagship brand called HR™. Our HR™ products are manufactured to OE standards, with highest priority given to quality and affordability.

- **DIAGNOSTIC EQUIPMENT AND SOLUTIONS**

We offer an extensive range of authorized OE and aftermarket test equipment that will enable you to provide industry-leading diagnostic services. Our product line includes garage auto equipment for diagnostics of power steering racks and pumps, shock absorbers, brake calipers, starters, alternators and voltage regulators; flushing and testing test benches for AC compressors. To help you get an immediate return on investment, we provide installation, training and on-going support on the equipment purchased from us.
- **TURBO BALANCING EQUIPMENT**

Turbo balancing requires critical tolerances and we offer industry-leading equipment that can balance your turbochargers to the tightest tolerances in the industry.
- **CLEANING SOLUTIONS**

At Eurodiesel Services, we offer industry-leading Ultrasonic and DPF cleaning solutions specifically designed for cleaning all types of auto industry components. We offer a high quality Ultrasonic cleaning solution under our own flagship brand, ED Solutions.
- **DIESEL FUEL INJECTION PARTS & PUMPS**

The fuel injection system is the most complex component in your diesel engine. Improper parts, maintenance, and care of your fuel injection system can cause complete failure. At Eurodiesel Services, we are authorized Component OEM and Aftermarket Distributors for various name brand products and our long-standing relationships with manufacturers allows us to offer an extensive range of genuine parts and products for less.
- **ULTRASONIC CLEANING EQUIPMENT**

Ultrasonic cleaning is the better and green way to clean. At Eurodiesel Services, we offer industry-leading ultrasonic cleaning equipment and solutions specifically designed for cleaning all types of auto industry components.
- **AUTOMOTIVE PARTS**

We supply a wide range of automotive aftermarket spare parts, and are the authorized distributors for Bosch and Delphi automotive parts in certain parts of Africa.
- **TEST BENCH & SPECIALIZED TOOLS**

Whether you're an authorized diesel specialist or a vehicle repair shop, we can provide the right support and equipment to meet your needs. We offer an extensive range of OE and aftermarket diesel fuel injection testing equipment. We also offer an extensive range of specialized tools for dismantling and assembling fuel pumps.
- **RECONDITIONED PUMPS, INJECTORS AND TURBOCHARGERS**

We stock a comprehensive range of reconditioned pumps, injectors and turbochargers from Eurodiesel Services and other name brands. All items are reconditioned using OE parts, tested to OE specifications and backed by our Product Warranty Program.
- **TURBOCHARGERS**

We work with the largest manufacturers of turbochargers in the world to maintain a vast inventory of turbochargers and turbocharger parts to service any commercial or consumer applications.

OUR SERVICES

At Eurodiesel Services, our customers experience stress-free outsourcing of turbochargers and fuel injection service needs. We provide the convenience of Parts and Services under one roof; and a wide choice of OE, aftermarket and reconditioned parts. Our factory trained and experienced technicians give expert advice and are focused on the success of our customers. Customers buy from us with greater confidence when they avail our Parts & Labor Warranty program.

DIESEL FUEL INJECTION TESTING & REPAIR

Our workshops are equipped with state-of-the-art test equipment that give us the most efficient and precise way to examine components, so that we are able to provide the best repair solution for a diesel engine.

Our goal is to extend the life of the diesel engine and avoid costly downtime for our customers.

Our Diesel fuel injection service portfolio includes:

- Common Rail Injector Testing and Repair
- Mechanical Injector Testing and Repair
- HEUI and EUI Testing and Repair
- Common Rail Pump Testing and Repair
- Mechanical Pumps and EDC Pumps Testing and Repair

RECONDITIONING OF PUMPS & INJECTORS

At our workshops, we rebuild and recondition used turbochargers, and fuel injection pumps and injectors under the Eurodiesel Services brand.

Each part is completely stripped of its components, the worn-out components are scrapped, and new high-quality replacement parts are integrated. All rebuilt/reconditioned parts are tested for quality assurance and backed by our Product Warranty Program. With us, you have two options:

- Buy from our stock of reconditioned items;
- Exchange your used item for a reconditioned item from our stock, for a value.

TROUBLESHOOTING & ENGINE DIAGNOSTICS

Our specialist diagnostics equipment gives us dealer level access to most vehicle computer systems. There are literally hundreds of potential error codes that can only be read by specialist vehicle diagnostic equipment. By diagnosing a problem correctly and quickly we ensure cost-effective repairs at all times.

TURBOCHARGER SERVICE & REPAIR

Turbochargers are precision engineered products and repairing them is a highly skilled job that requires the use of specialist equipment and precision engineered repair parts. We are equipped with a unique equipment that integrates all that is needed to repair turbochargers and gives us 100% precision. We use high quality parts, including Melett and Jrone, and have full understanding of the complete turbo assembly.

GASOLINE FUEL INJECTION TESTING & REPAIR

Our technicians are trained and fully equipped with automated equipment to repair all types of gasoline fuel injection systems, including the modern high-pressure GDI. Used injectors are carefully cleaned, without damaging any components, using an ultrasonic cleaning machine.

ENGINE CARBON CLEANING

Carbon deposit in a vehicle engine may cause serious issues such as vibrations, cold start misfiring, jerks or surge at stops, increased fuel consumption and, in severe cases, may require the engine to be scrapped. Our carbon cleaning services uses a 20-minute simple and safe, yet efficient process requiring no dismantling of engine parts or use of harmful chemicals. Vehicle owners have experienced increased power, gain in mileage, reduction in noise and vibration, and lower emissions. Our Carbon cleaning service is extended to all types of engines from passenger cars to heavy vehicles and equipment.

AC COMPRESSORS

Several factors contribute to the malfunctioning of vehicle AC compressors, including overheating, dust and moisture in the system. However, early detection can save costly repair or replacement of parts and system, but requires careful diagnostics. The diagnostics equipment we use simulates operation in a vehicle, can get real-time test results, and test before and after renovation. Our team of experts will help you in diagnosing and fixing your AC problem, as well as help with preventative care in a timely manner.

HYBRID BATTERY MAINTENANCE SERVICE

All hybrid batteries wear out over time, but several factors influence when that happens—battery chemistry, the number of charge and discharge cycles and temperature extremes. At Eurodiesel, we use sophisticated equipment to test, analyze and rebuild hybrid batteries. Instead of buying new, our customers have the option to fully replace or rebuild their battery pack at a fraction of cost to buying new. Alternatively, we also have a range of new battery packs to fit various models. Our hybrid battery packs have an extended lifespan and come with warranty options.

DPF CLEANING SERVICE

You can entrust us with the cleaning of your Euro V and Euro VI applications fitted with DPFs, EGRs, SCR, DOCS, Catalytic Convertors, inter-coolers, manifolds along with other components. We diagnose the complete selective catalytic reduction (SCR) system with special software and modulate the complete system. Further, we also provide a full 'Before & After' report, so that our customers can know the exact condition of their DPF. With our latest technology cleaning equipment, we are able to offer our customers best performance at an economical price with a fast turnaround.

ELECTRONIC POWER STEERING

EPS unit replacement is no longer needed! We are equipped to repair Electronic Power Steering in the most efficient manner. Our diagnostic tools allow us to test EPS pumps, racks and columns on real-time basis and identify a software or mechanical fault with ease. We are also equipped to test the torque sensor of a steering rack.

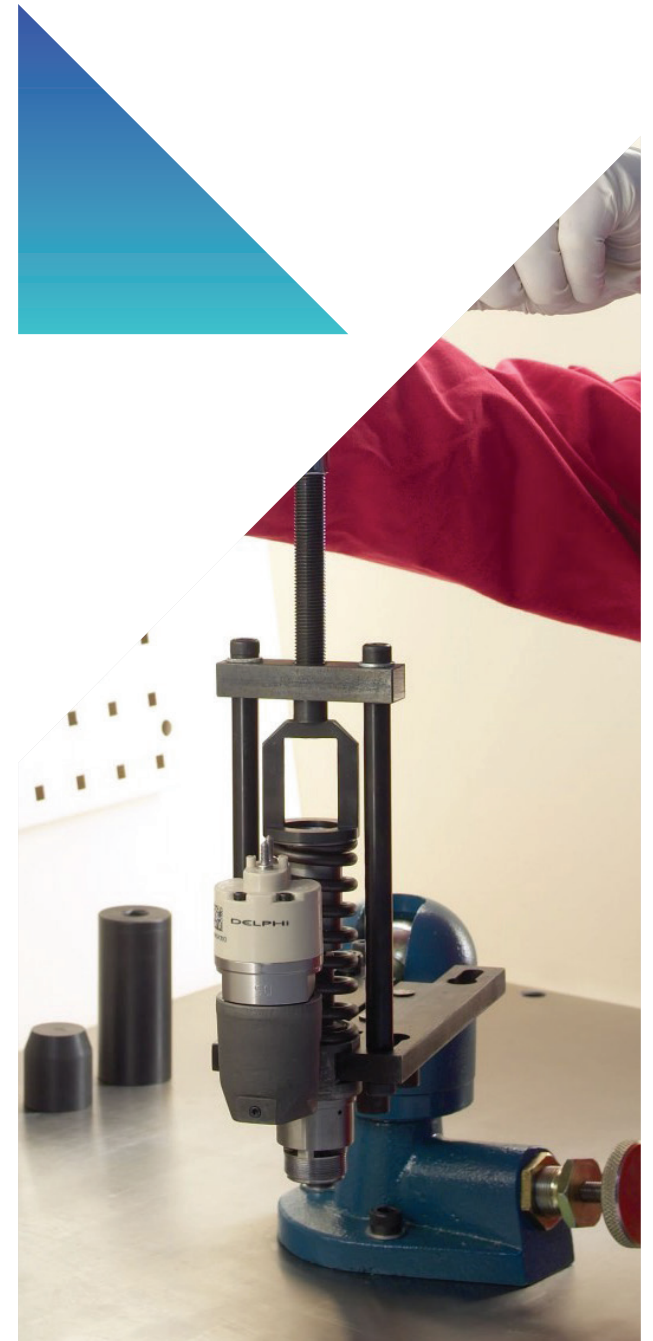

STARTERS AND ALTERNATORS

Whether you have a light, heavy, or industrial vehicle, we are well-equipped to quickly turnaround a complete quality diagnosis of alternators and starters. We can evaluate the technical condition of 12/24V starter motors, alternators, as well as all types of the latest voltage regulators under different loads and are able to test results real-time. Furthermore, we perform a post-maintenance test of the electrical unit to give us additional accuracy of repair.

AUTHORIZED SERVICE AGENCIES

Our processes, OE test equipment and service centers in the United Arab Emirates and India are authorized by world-renowned OE brands.

EURODIESEL SERVICES ACADEMY

We value knowledge-sharing and are committed to help our customers implement their plans of scaling-up their business by upgrading their technician's skills.

At Eurodiesel Services Academy (the 'Academy'), we train technicians to enhance their skills and knowledge of the latest diesel and gasoline injection technologies. Technicians are provided hands-on experience, with the latest equipment, from qualified and experienced trainers in the technical field. We offer training in the following areas:

- **DIESEL TECHNOLOGY**
- **DIESEL TECHNICIAN**
- **DIESEL COMPONENTS**
- **TEST EQUIPMENT PURCHASED FROM OUR STORES**
- **MECHANICS**
- **VEHICLE DIAGNOSTICS**
- **VEHICLE ELECTRONICS**
- **VEHICLE ELECTRICAL SYSTEMS**
- **GASOLINE INJECTION**
- **TURBOCHARGER REPAIR**

Certification & Support

Participants are certified by the Academy on successful completion of the training courses. Our students receive on-going support in areas covered under the training.
